Cl **H04N 5/60****(54) AUTOMATIC CONTROL CIRCUIT FOR TV SOUND OUTPUT****(57) Abstract :**

The circuit for the automatic control circuit outputting the sound constantly regardless of converting channel, includes a sound signal output part, a sound amplification part, the first DC voltage conversion part, an automatic control part, an on/off switching part operating the automatic control part, a buffer part controlling a DC voltage, a micom receiving the sound control signal and outputting into the on/off switching part, to maintain the sound constantly and extend the life of the sound amplification.

**LEGAL STATUS**

Date of request for examination : 21.04.1993

Number of opposition :

First disposal : decision of registration

Date of opposition :

Date of first disposal : 13.11.1996
